

EDCC - HIKING ATTACK

STAGE TYPE: Dynamic

START CONDITION: Default

THREAT TARGETS: 2

START POSITION: Standing at start position, either arm outstretched holding wallet, other arm relaxed at side

SCORING: Unlimited

SCENARIO DESCRIPTION: While on a remote hike with your partner you reach a narrow section of the path with thick bush on either side.

Suddenly two aggressive men appear holding knives and demand your valuables.

You comply and start handing over your wallet, but as you do the front man lunges at you with the knife while the other also starts towards you, knife held high.

COF NOTES: The tires on either side of the "path" represent thick bushes.

They are not a boundary/fault but an obstacle and can be stepped into/over.

The non-threat target represents your partner. You cannot move beyond the non-threat target.

The first threat target is approximately 1m from the start position, and the back threat target is approximately 2m behind the first target.

SAFETY NOTES: If stepping into tires, be careful of tripping/stumbling.
